

Warranty conditions of 01.10.2012

Standard warranty

The standard warranty applies to all products supplied by APT and covers a period of 12 months from date of shipment (date of delivery note). The scope of services includes the repair (materials and labor) or possibly a replacement of the component in our house as well as the return of the standard service within Germany. For repairs on site all additional costs incurred (travel, etc.) are excluded from reimbursement.

Excluded from the guarantee are damages that are similar by the misuse, improper use , or improper interference were caused (e.g. Pollution, damage is visible, adjust parameters, etc.).

Extended warranty

The Extended Warranty applies to all new appliances (including options) of the instrument families ATL01, PMD02 and PMF01 from **delivery date of 01/10/2012**. Extended Warranty works for the same conditions as the standard warranty with the following exceptions:

- The Extended Warranty covers a period of **60 months from delivery date** (date of delivery note). To make use of the extended warranty is a review at least annually with performance and calibration of the equipment by employees of APT or other appropriately qualified and trained professionals, through APT.
- The correction of these defects , the standard warranty applies (see above) :
Error in wear parts (Proportional valves , control valves , sensors , mass flow controllers , pressure regulators, ...) or components for data retention (batteries) and data loss
